

## Lesson 3 APP Custom Control

### 1. Project Outcome

Perform the action group file “No.20” edited in this unit “Lesson 2 Action Editing Teaching” by the custom function of the mobile APP.

### 2. Complete Program

#### 2.1 Confirm Work

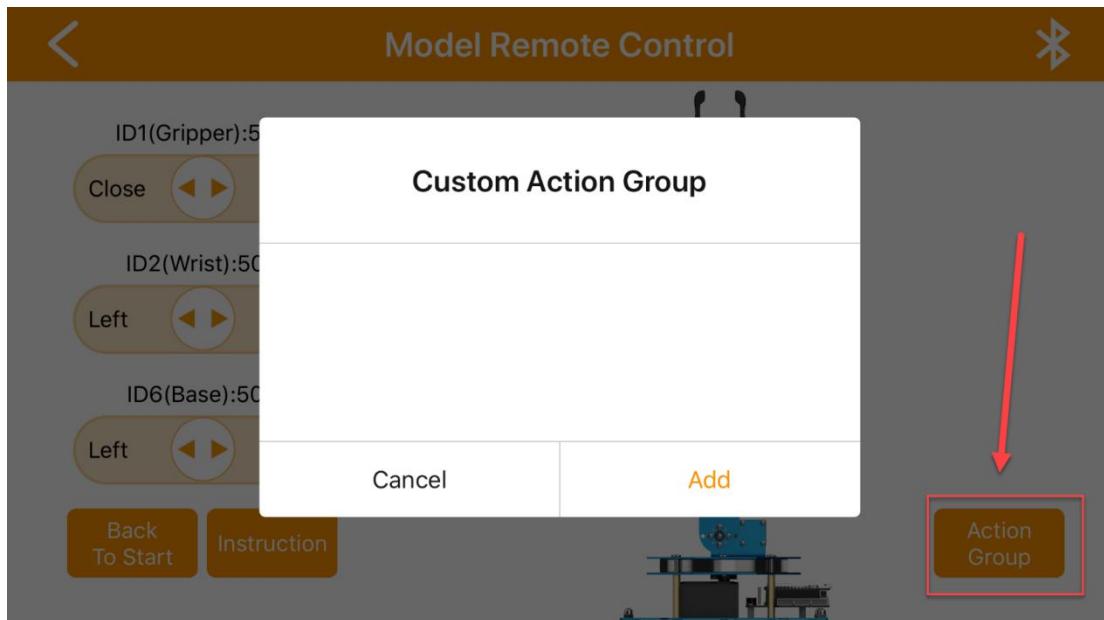

- 1) Confirm that mobile APP Bluetooth and GPS are turned on.
- 2) Confirm that the No.20 action group have been successfully download to robot arm controller (the download is successful, the PC software will prompt).

#### 2.2 Preparation

**Step1:** Turn on the robot arm switch, and then open mobile APP “Wonderbot”.

**Step2:** According to content “ 2.Handle Games Learning->Lesson 2 Mobile phone APP control” to connect the device.

**Step3:** Enter xArm remote control interface, and click the “Action Groups ” button on the main interface, and click "Add" in the pop-up.

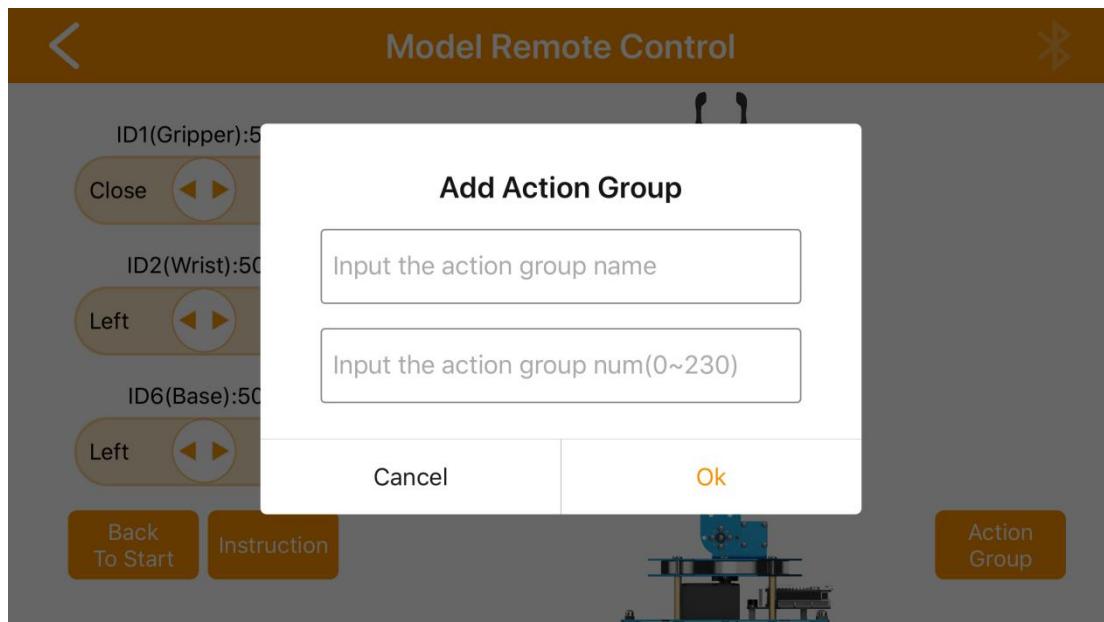

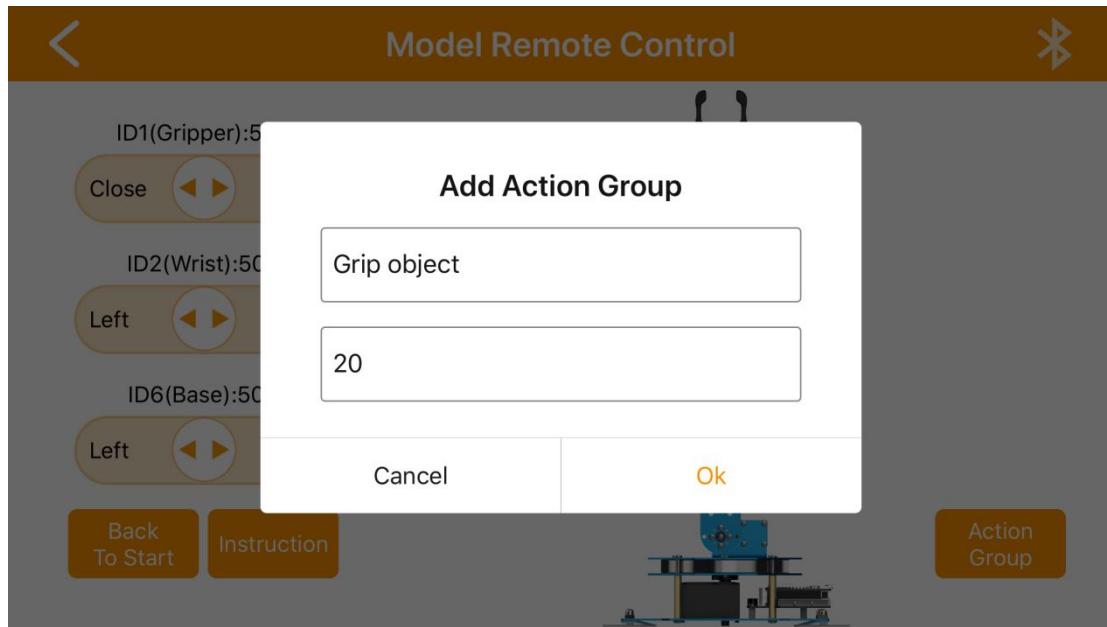

**Step4:** Fill in the action group name and action group in the pop-up dialog box.

---

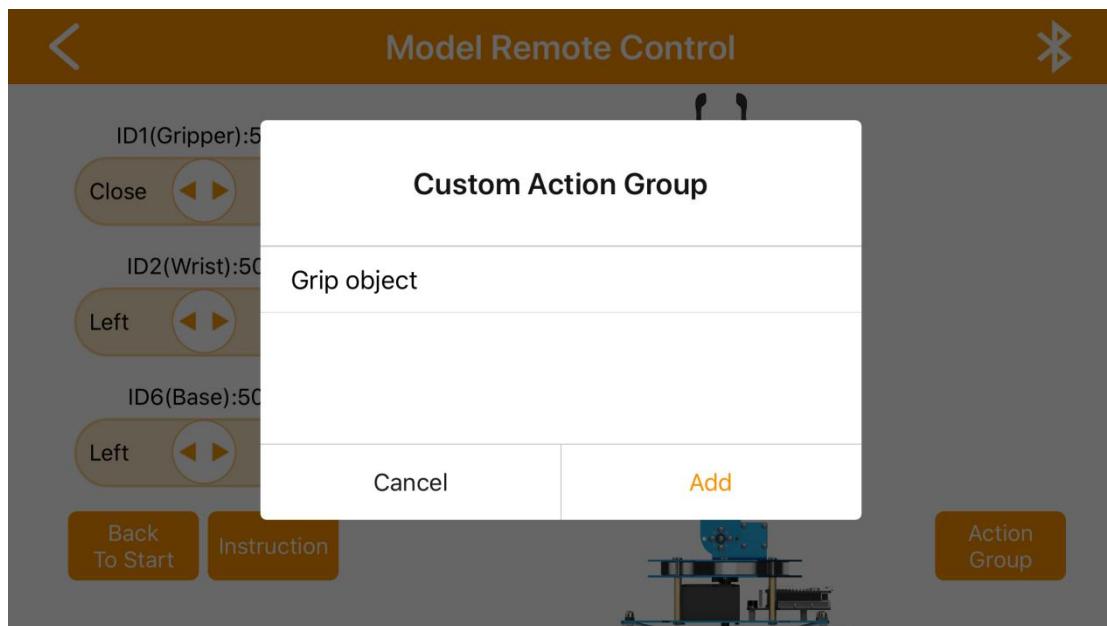

The action group name can be filled in arbitrarily, but the action group number must be filled in correctly, otherwise it cannot be realized.

---

**Step 5:** After adding, click the action group name to execute it once.

**Step6:** If you need to modify or delete action group, slide or long press the action name button and click “Delete”.
